Profile Summary

Software Engineer (B.Tech CSE - AI/ML, 9.3 CGPA) with strong fundamentals in Data Structures, Algorithms, and System Design. Built REST APIs and full-stack AI applications in Java, Python, and JavaScript. Solved **200+ LeetCode problems**; eager to own features end-to-end in production.

Education

Vellore Institute of Technology **2023 - 2027**
B.Tech in Computer Science & Engineering (AI/ML) *9.3/10 CGPA*

Experience

Infotact Solutions **Oct 2026 - Present**
Data Associate L1 (Intern)

- Collaborate with cross-functional teams to turn project goals into data-driven solutions using **statistical and machine learning techniques**.
- Clean and preprocess **structured and unstructured data**; build, tune, validate, and deploy ML models with **Python, scikit-learn, and TensorFlow**.
- Perform EDA and visualize insights with **Matplotlib and Seaborn**; document methods and code for reproducibility.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Core CS: Data Structures & Algorithms, System Design, OOP, DBMS, Operating Systems
Backend & Frontend: Spring Boot, FastAPI, Node.js/Express, REST APIs, JWT Auth, React, Next.js
Databases: MySQL, PostgreSQL, QuadrantDB
AI/ML: RAG, Vector Search, LangChain, LangGraph, Scikit-Learn, TensorFlow, NLTK
Tools: Git, GitHub, Docker, CI/CD, Postman

Projects

Synapse – Custom LLM/RAG Vector Engine | GitHub **Java, Spring Boot, Ollama, HNSW, KD-Tree**

- Implemented **HNSW and KD-Tree from scratch** with a live `/benchmark` endpoint to compare query latency, reaching **sub-millisecond** search times.
- Architected an offline-first RAG chatbot exposing **14 REST API endpoints** for vector search, document ingestion, and LLM-based Q&A.
- Built a dual embedding pipeline supporting 16-dim demo vectors and **768-dim** semantic embeddings via Ollama's nomic-embed-text.

Kore Logic – AI Career & Learning Platform | GitHub **Next.js 15, FastAPI, PostgreSQL, LangChain**

- Built a full-stack platform with **19 REST API endpoints** and a normalized PostgreSQL schema of **10 core entity tables** via SQLAlchemy.
- Constructed a RAG pipeline (LangChain, ChromaDB, GPT-4o) powering a mentor chatbot, **achieving <200ms latency on semantic searches**.
- Implemented a cosine-similarity matching engine over skill embeddings to compute real-time internship "Match Percentage" scores.

Aura Tender – AI Procurement Compliance Platform | GitHub **Python, FastAPI, React, Gemini, RAG**

- Built an AI compliance evaluation platform automating multimodal document analysis, **cutting manual review effort by over 80% per tender**.
- Deployed a zero-shot Gemini 1.5 Pro extraction pipeline that cross-references bidder evidence against checklists, **saving multiple hours per document**.
- Designed a human-in-the-loop flow that flags ambiguous documents for manual verification, improving auditability.

Certifications and Achievements

- **Google GenAI Internship** — SmartInternz (2026)
- **Applied Machine Learning in Python** — University of Michigan (2025)
- **Intro to Generative AI** — IBM (2025)
- **AWS Technical Essentials** — AWS (2025)
- **200+ DSA problems solved** — LeetCode
